## Coronavirus and Always Planning for Our Loved Ones

The Kendall County Health Department, alongside the Kendall County Emergency Management Agency want you to continue to be mindful of others in our community during this COVID19 pandemic.

It is important to recognize the special needs of our elderly, especially those with chronic conditions. The elderly are often more vulnerable because they are more likely to have impaired physical mobility, chronic health conditions or social and economic limitations that interfere with their ability to prepare, respond and adapt during challenging situations. Being prepared can help to reduce fear, anxiety and potential losses. We want to urge residents to reach out and [assist our elderly](#) loved ones.

Also, it is important to [plan for pets](#). What is good for you and your loved ones, is good for pets, so get them ready today.

Please continue to go to the Kendall County Health Department [website](#) to keep in touch with this evolving situation. Community members are welcome to call the Kendall County Health Department at (630)553-9100 with questions.

For more information on COVID-19, please visit these informational sites:
