Currently, IDPH is reporting a total of 125,915 cases, including 5,795 deaths, in 101 counties in Illinois. The age of cases ranges from younger than one to older than 100 years. Within the past 24 hours, laboratories have reported 18,903 specimens for a total of 1,000,919. The preliminary seven-day statewide positivity for cases as a percent of total test from May 29–June 4 is 6%.

A pet cat recently tested positive for COVID-19 after becoming sick in mid-May. The cat was in a home with people who had tested positive. This is the first animal to test positive for the virus in Illinois. There is no evidence COVID-19 is transmitted from animal to humans. However, if you are sick, you should distance yourself from pets as well as people.

*All data are provisional and will change. In order to rapidly report COVID-19 information to the public, data are being reported in real-time. Information is constantly being entered into an electronic system and the number of cases and deaths can change as additional information is gathered.
